"Largest Growers of Dutch Bulbs in America"

BYRON CENTER, MICHIGAN

INTRODUCTION

"The Oldest Growers of Dutch Bulbs in America"

Established in 1914, with scarcely enough bulbs to fill a small city lot and with just a few customers in Grand Rapids, we have grown in the latter years to the extent that we have shipped bulbs (our bulbs exclusively) to 37 states, also back to the Netherlands, Africa, Canada, and other foreign countries.

We have no large warehouse, no pretentious offices, no large office and field force to maintain. Ours is strictly a family affair, with the minimum expense. Backed by almost a half century of experience here and in The Netherlands, Mr. Albert Kaptein, Sr., and three sons handling the entire business. The foregoing facts will assure customers of personal service from people that know their business.

We ask you to compare our prices with only the best on the market, and with those bulbs that are **GUARANTEED** to bloom 100% such as we do ours.

We start shipments the earlier part of August. And we cannot stress too much the advantage of early ordering. For narcissi love an early start, **AND** by ordering early you are assured of the very best.

The exact location of our Farm is 7 miles south of Grand Rapids on Division Road (U. S. 131) or just 1 mile south of Cutlerville.

NOTE. Garden club members, 20% discount is allowed all club members on orders amounting to \$5.00 or more.

We Start With Our Own New Originations

The following are the results of 15 years of careful breeding and hybridizing. Descriptions are as near correct as possible, although mere words cannot describe the size, color, and quality of these mammoth flowers. Unless otherwise noted these are all Bicolors.

	Each
Pride of Michigan—The earliest of all, perianth of creamy white, trumpet deep yellow, very large	\$ 3.00
Leo—White perianth, lemon yellow trumpet.....	1.00
Mrs. Edmund Morris—Perianth creamy white, very large canary yellow trumpet.....	1.50

Wolverine—Deep golden yellow cup, perianth lighter	2.00
Pere Marquette—Large yellow trumpet, lemon yellow perianth, star shaped.....	2.00
May Cup—Orange cup, perianth creamy white.....	1.00

Before going further, we want to again remind the public that it is NOT hard to grow a garden full of beautiful flowers. The following simple directions will verify that.

All Narcissi bulbs listed must be planted early in the fall, 5 in. deep and 6 to 8 in. apart. Grape Hyacinths and others listed should be planted 3 in. deep and 4 to 5 in, apart. Before extremely severe weather comes on, cover the beds with about 4 in.

of leaves; if coarse manure or straw is used cover 6 in. In the spring remove half the covering and the balance as soon as the plants begin pushing through the soil.

We continue now with our list of Standard varieties:

	Per Doz.	Per 100
Princes Ajax Narcissi—Very early, primrose perianth, orange yellow trumpet.....\$.75	\$4.50
